CIRCULATING THROUGHOUT THE VAST AGRICULTURAL AREA OF PALM BEACH COUNTY

Stockpile Rock For 7 Glades Roads

The county commission this week gave its approval to a State Road Department proposal to stockpile about 700,000 cubic yards of road material for highway construction in the Glades.

Seven road improvement projects are scheduled in the Glades area and most of the plans call for fill rock for the roads.

Under the road department plan, needed rock will be pumped from Lake Okeechobee and stockpiled at the county airport at Pahokee. From there it will be trucked to sites of the road projects.

Funds to pay for the fill will be advanced from the county's secondary road account and will be repaid by the state as the fill is used.

Polk County Votes To Sell Liquor

BARTOW—The question in Polk County now is, "When do they start selling liquor?" The answer lies with the State Beverage Department which will issue new licenses for the sale of intoxicants for the first time in the history of the county.

Polk County voters approved the legal sale of liquor, ending 78 years of prohibition in one of the nation's largest "dry" counties. It was the seventh such election held since national prohibition was repealed and the 13th wet-dry vote since 1887.

Dick Pope, president of the Legal Control Association, backer

of the move to legalize liquor, was vacating in England during the election but was informed of the results by telephone. The owner of Cypress Garden stayed up until 3 a. m. London time awaiting a verdict on the issue.

Deterioration of Cuba's agricultural economy appears to be far more extensive than the big drop-off in the sugar crop.

I note that the Cuban Veterinary Association in exile recently predicted virtual destruction of the island's commercial poultry industry within 8 months due to disease and lack of breeding stock.

Quality of fowls is said to have degenerated greatly and broiler production has slumped to about 300,000 a month. That's a drop in the bucket for the island's population. Cubans have long depended on fowl for a large share of their meat supply.

In the first 18 months of the 1960-62 biennium our División of Animal Industry issued permits for shipments of more than 16 million chicks to Puerto Rico, the Virgin Islands and 29 other countries, mostly in Central and South America. But our shipments to Cuba stopped in April, 1961.

From April, 1960, through March 1961, we exported more than 5 million chicks and 146,230 dozen hatching eggs to Cuba.

In addition to the desperate situation in the poultry industry, the exile veterinary group reports cholera is spreading among Cuba's hogs. If cholera is present, the hog population is doomed. Unchecked, the disease can wipe out every porker on the island. And the exile group says vaccines, medicines, hygiene and technical help are lacking.

U. S. News & World Report notes that foods of all kinds are drastically short in Cuba. Monthly rations allow one chicken and five eggs per family. Chickens sell at \$2 a pound, live weight, feathers and all. On the black market—which is flourishing—chicken is priced at \$2.40 a pound and eggs 25 cents each.

According to U. S. News, the big question now is: How much worse can things get before Cubans will become desperate enough to try to rise against Castro?

Because we have embarked on a statewide program to eradicate hog cholera in Florida, new developments in measures to fight this deadly disease are of particular interest to the Department of Agriculture.

Recent information indicates a Purdue University research veterinarian has a new vaccine that may be a big improvement over anything on the market today. A midwest laboratory has applied to Federal authorities for a license to market it. If the license is granted, the vaccine may be commercially available this year.

As reported in the National Hog Farmer, Dr. Don Gustafson says

his new non-virulent vaccine, the result of 8 years of research, will produce resistance to cholera in 3 days compared with the current average of 5 to 7 days for attenuated vaccines presently in use.

Permit vaccination of pigs at an earlier age.

Permit administering by aerosol spray as well as by injection.

Eliminate the need for using anti-hog serum.

Veterinarians tell me that giving the vaccine as a spray might be termed "revolutionary." Dr. Gustafson said he has had success with this method by spraying the vaccine directly into a pig's face.

I believe that polio vaccine that can be taken orally was a revolutionary development in the field of human medicine. It appears to be effective. Let us hope that new developments in animal disease prevention will be as successful.

The license sought for manufacture of the Purdue researcher's vaccine, however, is for its use only as an injectable. It may take some time before official approval is obtained for such a radically new method as spraying.

From Ottawa comes a report that a Canadian-developed process is providing irradiated potatoes to personnel at weather stations in Arctic regions. They're fresh-tasting, too.

Cobalt-60 irradiation process inhibits sprouting in stored vegetables, a factor that withers them and speeds decay. There's no harmful effect to persons eating the treated products.

*"Today we need a nation of Minute Men
citizens who regard the preservation of freedom
as a basic purpose of their daily life"*

—JOHN FITZGERALD KENNEDY

10 days after his inauguration
as the 35th President of the
United States.

Twenty years ago, in the dark, uneasy days before Pearl Harbor, the Minute Man of Concord, timeless symbol of our Nation's determination to defend its freedom, emerged as the emblem of the U. S. Savings Bonds Program. When war came, the Minute Man became the rallying force behind the huge and overwhelmingly successful effort to back our fighting men with War Bonds.

In this, the 20th anniversary year of Savings Bonds, the Minute Man of Concord calls all Americans to an unremitting effort to help preserve our peace and freedom, threatened by forces more powerful and resourceful than those we faced in 1941. Though this effort will take many forms, one way open to all is the continued investment in Shares in America, U. S. Savings Bonds, by "citizens who regard the preservation of freedom as a basic purpose of their daily life."

New 3 $\frac{3}{4}$ % interest on U.S. Savings Bonds

The Treasury explains why the new ones you buy and the ones you own now are better than ever

Q: How does the new 3 $\frac{3}{4}$ % interest rate benefit me?
A: With Series E Bonds, the rate turns \$18.75 into \$25.00 fourteen months faster than the old rate. Your savings increase faster, because your Bonds mature in just 7 years, 9 months.

With Series H Bonds, the 10-year maturity period stays the same but more interest is paid you each six months. With both E and H Bonds the new rate works out to 2 $\frac{1}{2}$ % for the first year and a half; then a guaranteed 4% each year to maturity.

Q: When did the new rate become effective?
A: June 1, 1959.

Q: Does the new rate change the Bonds I bought before June 1, 1959?

A: All older E and H Bonds pay more now—an extra $\frac{1}{4}$ % from now on, when held to maturity. The increase takes effect in the first full interest period after June 1.

Q: Will the Bonds I own automatically earn their new rate?

A: Yes. You don't need to do a thing—just hold on to your Bonds.

Q: When my E Bonds mature, will they keep on earning interest?

A: Yes. An automatic 10-year extension privilege went into effect along with the new interest rate. This means your E Bonds will automatically keep earning interest after maturity.

Q: With the new interest rate, should I cash in my old Bonds and buy new ones?

A: No. The automatic $\frac{1}{4}$ % increase makes it unnecessary—and in almost every case it is to your advantage—to retain your present Bonds.

Q: How are series H Bonds different from series E Bonds?

A: The chief difference is this: You buy H Bonds at full face value and the interest is paid by Treasury

check every six months for the life of the Bond. You buy E Bonds at 75% of face value and the interest accumulates to maturity. H Bonds provide income for living expenses, while E Bonds build a nest egg for the future. That's why many retired people hold H Bonds and families saving for, say, a child's education, buy E Bonds.

Q: In what denominations can I buy series E and series H Bonds?

A: E Bonds: \$25 (cost \$18.75), \$50 (cost \$37.50), \$100 (cost \$75.00), \$200 (cost \$150.00), \$500 (cost \$375.00), \$1,000 (cost \$750.00), \$10,000 (cost \$7,500.00).

H Bonds: \$500, \$1,000, \$5,000 and \$10,000. They are priced at face value.

Q: How safe are U.S. Savings Bonds?

A: Savings Bonds are an absolutely riskless way to save. The United States Government guarantees the cash value of your Bonds will not drop, that it can only grow.

Q: What if my Bonds should be lost, stolen or destroyed?

A: You can't lose. Every Bond purchased is recorded by the Treasury. If anything happens to your Bonds they are replaced—free.

Q: Where can I buy Bonds?

A: Buy E Bonds at any bank—it takes only a few minutes. Buy them automatically through the Payroll Savings Plan where you work. This Plan means you can have any amount you name automatically deducted every payday. The Bonds you buy by installments are delivered to you automatically, too. Your bank will take your order for H Bonds.

Q: How do I help strengthen America's peace power when I buy U.S. Savings Bonds?

A: Peace costs money—money for military strength and for science. And money saved by individuals helps keep our economy sound.

Christian Science Group Of Canal Point

CHURCH OF CHRIST

The basic power behind change and evolution will be explored in all Christian Science churches this Sunday. The Bible Lesson is entitled: "Is the Universe, Including Man, Evolved by Atomic Force?"

Bible references will include this verse: "Behold, I create new heavens and a new earth; and the former shall not be remembered, no come into mind" (Isa. 65:17).

Among the related readings will be this sentence: "Let there be light," is the perpetual demand of Truth and Love, changing chaotic order and discord into the music of the spheres" ("Science and Health with Key to the Scriptures" by Mary Baker Eddy, p. 255).

Mr. And Mrs. Morris Go To Convention

Jay Morris, an assisting minister of the Belle Glade Congregation of Jehovah's Witness, said today plans have been finalized for the forthcoming eight-day international conventions of the religious group scheduled for Milwaukee, Wis., June 30—July 7, and Yankee Stadium, New York, July 7—14.

Mr. Morris, 79, of 140 E. Canal Street South, of Belle Glade will be the oldest local delegate representing the local congregation.

Morris said interest in the religious work of Jehovah's Witnesses keeps him active in his advanced years. He said "There are two viewpoints expressed on the aged. One is, You can't learn anything when you get older. The other opinion expresses the view, 'They're never too old to learn.' I go along with the latter."

Mr. Morris and wife Arlie are traveling to Milwaukee by plane, and this will be a first plane trip out of the Glades for these two old-timers. All previous trips have been made by car or train, but both have decided they would like to try the really modern way of travel this time. They feel that traveling this way they will be able to return to the Glades much sooner, and be ready to share the new things they learn with their d neighbors that much quicker.

The Morris' will be accompanied by Mr. and Mrs. Miles Crum also of the local congregation.
